If this is a pit closure: (1) attach a diagram of the facility showing the pit's relationship to other equipment and tanks. (2) Indicate disposal location: (check the onsite box if you are burying in place) onsite ☒ offsite ☐ If offsite, name of facility: _____. (3) Attach a general description of remedial action taken including remediation start date and end date. (4) Groundwater encountered: No ☐ Yes ☐ If yes, show depth below ground surface _____ ft. and attach sample results. (5) Attach soil sample results and a diagram of sample locations and excavations.

Additional Comments: Sample soil from deep bury trench on east side of reserve pit. Check for chlorides & TPH as per guidelines. (1st sample from the north and @ the NE corner of reserve, 2nd sample 50' south of the 1st sample, from the trench. Pending any excavating as a result of these samples this trench will be back filled.
The west pit, (dug originally as a deep bury pit), due south of the wellhead where the discharge of the outer reserve pit was originally built, will be sampled for chlorides etc
This pit will be lined w/12 mil. Cuttings and any contaminated soils will be deep buried, capped w/20 mil and covered w/ min. of 3' soil. Soil from the pit area will be sampled and check for any delineations. (Sample middle and four corners)

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☒, a general permit ☐, or an (attached) alternative OCD-approved plan ☐.
