12. CHECK APPROPRIATE BOX(ES) TO INDICATE NATURE OF NOTICE, REPORT, OR OTHER DATA

TYPE OF SUBMISSION	TYPE OF ACTION			
☐ Notice of Intent	☐ Acidize	☐ Deepen	☐ Production (Start/Resume)	☐ Water Shut-Off
☒ Subsequent Report	☐ Alter Casing	☐ Fracture Treat	☒ Reclamation	☐ Well Integrity
☐ Final Abandonment Notice	☐ Casing Repair	☐ New Construction	☐ Recomplete	☐ Other
	☐ Change Plans	☐ Plug and Abandon	☐ Temporarily Abandon	
	☐ Convert to Injection	☐ Plug Back	☐ Water Disposal	

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Removed wellhead, anchors, and all other debris from location, installed dry hole marker

Removed caliche and contaminated soil from location and access road

added 1-2 feet clean top soil as needed

leveled and contoured surrounding area

Rip and seeded disturbed area with BLM #2 seed mix

Job complete 6/25/14

LRD 1/5/14
Accepted for record
NMOC

Category GENERAL Date 01/26/2015

1/21/2015 ES/SA Inspection: The DHM is below surface so I could not verify the information required to be present on it. The location is free of all noxious and invasive weeds. All disturbance areas are free of any and all oil or salt-contaminated soils. A complete 360 walk around of the original disturbance area and the surrounding area show that general housekeeping is required for this location at this time (remove all trash unused equipment and misc. debris). The caliche has been removed from the location. The road is still in place for other location in the area and a berm has been installed to deter vehicle traffic from entering the location. The rip is cross slope and the reclamation looks good with sporadic mulch and revegetation is well on its way with about 05% coverage. The power poles are still present on the location. It will be placed into monitoring statues after the issues identified have been resolved. Monitoring will continue Intel the desired growth has occurred and the power poles have been removed. No other issues were identified at the time of this inspection.
