13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Location was built, but well was never drilled. Parallel returned the 200' x 200' drilling pit area to its natural state and reseeded the pit area 2 times resulting in good grass cover. The location pad built 200' x 400' w/ ~2200 yards of caliche was reclaimed and returned to its natural state w/ ~2200 yards of top soil. The pad area was then reseeded with grass seed mixture supplied by BLM. The area of the drilling pit and the location pad were fenced to keep the cattle traffic off of freshly seeded area. The caliche road leading into the Little Joe was 2650' in length to the South was reclaimed and returned to its original dirt road.
