13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

A berm was erected in front of the existing oil field road to deter vehicle traffic from driving on the reclaimed pad site (approximate berm height 2 to 3 ft). The area where we had little vegetation growth due to vehicle traffic turning around on the pad was plowed, seeded, & dragged (approximated area 1 to 1-1/2 acres). We used BLM 3 seed mixture at 8 pounds per acre. The power poles near the location are not for location usage. They traverse the site and are still in use.
