| By Whom?   | Date and Hour                             |                            |
| Was a Watercourse Reached?<br><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No  | If YES, Volume Impacting the Watercourse. |                            |

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* The horizontal pump and the high-level alarm failed causing the tank to overflow. Approximately 500 barrels were released into the lined containment. An estimated 3-4 barrels breached the containment and flowed approximately 500-feet into the pasture. A vac truck was called to the location to recover the free standing fluids.

Describe Area Affected and Cleanup Action Taken.\*

Talon/LPE was retained by Legacy Reserves to develop a work plan and remediate the affected area in the pasture. Initial sampling activities were conducted on 4/6/2016.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
