13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum respectfully requests permission to flare for a period of 90 days or until March 30, 2016 due to abnormal system pressure in the Agave lines.

The possibility to flare will not be consistent, therefore, the volume can easily fluctuate. Estimated Flare per day = 305 +/- MCF.

This flare could result longer than the 24 hour period and possibly more than the 144 hours cumulative authorized under NTL4A III.A.

Flare volumes will be reported on OGOR.
