13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

This Sundry Notice is filed regarding the Notice of Incidents of Noncompliance-No.16HD006I that we received on March 9, 2016 for the Aciete Negra #4 well.

- We have removed all equipment from this site.
- We have placed a dryhole marker at the wellhead.
- We are removing the caliche from the well site in preparation for the seeding of this location.
- The seeding process will be completed before the extended seeding deadline of mid-May and we will contact the BLM a least three working days prior to the seeding of the location.
- We will use the seed mixture (see attached BLM Seed Mix) that the BLM provided in Aciete Negra's approved Drilling Application (Form 3160-3).
- Once the seeding is completed, we will send in the signed NOTICE OF INCIDENTS OF NONCOMPLIANCE stating we have completed the reclamation of this site.

Due in part to inclement weather at the well site, we are requesting a 2-week extension to the 4/4/16 deadline in order to finish the removal of the caliche and prepare the site for seeding.

14. I hereby certify that the foregoing is true and correct. Name (Printed/Typed)
