Describe Cause of Problem and Remedial Action Taken.*
The plug on the strainer running to the number three water injection pump corroded resulting in a release of 7 BBLS of produced water. The number 3 water injection pump was shut down immediately to prevent further release. The corroded plug was replaced on the strainer.

Describe Area Affected and Cleanup Action Taken.*
7 BBLS of produced water was released from a corroded plug on the strainer that runs from the water injection pump number 3. The approximate area affected was 3ft wide x 18ft long flowing to the south western part of the pad. All 7 BBLS of produced water released remained on location. None of the released fluid left location. Vacuum truck recovered approximately 6 BBLS of the released produced water. Environmental agency will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
