Describe Cause of Problem and Remedial Action Taken.\*

3BBLS PW and 2BBLS Oil was released due to a hole in the flowline located directly where the poly flowline transitions into metal pipe. The well was shut in and the valve at the heater was isolated to prevent further release. Repairs have been made.

Describe Area Affected and Cleanup Action Taken.\*

3BBLS PW and 2BBLS Oil were released with 0BBLS recovered. The release originated from the poly flowline near the header on location and flowed in a Southwestern direction leaving pad into pasture. The approximate size of the total area affected on pad was 15ft by 15ft. The total affected area off pad was 10ft by 65ft. An environmental agency will be contacted for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
