3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Included with this filing is a 3160-4 dated 1/26/06. This 3160-4 is a corrected version of the 3160-4 dated 12/29/05 that NGP filed on this well. The 3160-4 filed in December inadvertently did not include the current perforations. We are currently producing from the Indian Loafer Draw Upper Penn at 7020-7052. We have set a bridge plug @ 7600'. The perforations listed on the 3160-4 dated 12/29/05 are below the bridge plug.
