LIME ROCK has drilled this well's open hole injection zone from the 7" shoe @ 7550' to TD8700' on 4/19/17. Attached is a copy of the mud log from TD8700' to surface along with a CBL from 7500' to surface. While drilling the open hole, a flow of 300 ppm H2S was encountered. The open hole loggers refused to log the well due the H2S flow. We request that these two logs be sufficient for this well.
