13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompletable horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Well is on OCD inactive well list. Rockcliff Operating New Mexico submitted a NOI to recompletable this well and another well on the same lease (Teledyne 12 Federal #3) earlier this year. The Teledyne 12 Federal #3 was recompletable and initially showed oil production, however the amount of oil produced is not enough to make this well economic at the current oil price. Due to the fact that the recompletable on the Teledyne 12 Federal #1 was planned to be very similar to the Teledyne 12 Federal #3, Rockcliff Operating New Mexico LLC is requesting the option to TA both of these wells until a more economic climate exists.

Proposed TA Procedure: Set CIBP within 100' of uppermost perforations (currently 4,757'), fill with inert fluid, and pressure test to 500 psi with a pressure drop of not more than 10% over a 30 minute period.
