Subject Annual Mechanical Integrity Test (AGI SWD)

History: This message has been forwarded

Boyd

In answer to your query regarding the MIT on AGI SWD at the Artesia Plant. I have waived the requirement to perform an Annual MIT on this well. This waiver is contingent on the receipt by me of the monthly report discussed showing the daily pressures of all annuli (Tubing, intermediate casing and production casing).

Gerry Guye
Deputy Field Inspector
EMNRD-OCD Artesia

On Nov 14, 2003 I had a phone conversation with Mr. Will Jones (Engineer with the UIC program) and we came to the conclusion annual Casing Integrity Tests (MITs) are not going to be required at this time, since the well is under continual monitoring. I have asked that your office furnish a copy of the report, you send to Santa Fe, to me in the Artesia Office. This report must include the injection pressure and the annulus pressure. We will however make an annual visual inspection of the facility at least once a year.
