Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

EOG Y Resources, Inc. requests an extension of the sundry that was submitted on May 2, 2017 for the above mentioned facility. EOG Y has completed our physical inventory and the tanks on the location remain to be out of service. This location still stands as an economical well, and continues to be produced on average of one day per month. Production continues to be curtailed due to restraints at the IACX (formerly Lucid Energy) processing plant. IACX is in the process of resolving the restraints at the process plant, and once it is resolved EOG Y would need the out of service tanks on location in order to produce the well on a regular basis. Once the nitrogen issue is resolved, EOG Y would begin putting the tanks back into service and would also build berms around the tanks. This location will be reviewed and analyzed again by December 31, 2018 or after the issues at the plant are resolved to ensure the tanks are still needed at the location. A follow-up sundry would be submitted by January 31, 2019 or once the issues are resolved at the plant and tanks are put back into service.
