13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Cimarex Energy Co. requests to change the project area as indicated on the attached plat.

It has been widely assumed that the most important factor in the success of a new technology is the quality of the technology itself. However, the success of a new technology is also determined by the quality of the market for the technology. The market for a new technology is determined by the quality of the technology, the quality of the market, and the quality of the government. The quality of the technology is determined by the quality of the technology itself. The quality of the market is determined by the quality of the market itself. The quality of the government is determined by the quality of the government itself.

There is a need for the will to know where  
the plans, explained to the field, are  
being carried out, and to be able to  
report on the progress of the work.
