**GAS CAPTURE PLAN**

Date: 10/12/2018

**RECEIVED**

Original Operator & OGRID No.: EOG Resources, Inc. 7377  
 Amended - Reason for Amendment: \_\_\_\_\_

This Gas Capture Plan outlines actions to be taken by the Operator to reduce well/production facility flaring/venting for new completion (new drill, recomplete to new zone, re-frac) activity.

Note: Form C-129 must be submitted and approved prior to exceeding 60 days allowed by Rule (Subsection A of 19.15.18.12 NMAC).

**Well(s)/Production Facility – Name of facility**

The well(s) that will be located at the production facility are shown in the table below.

| Well Name                      | API                   | Well Location (ULSTR) | Footages           | Expected MCF/D | Flared or Vented | Comments       |
|--------------------------------|-----------------------|-----------------------|--------------------|----------------|------------------|----------------|
| Golden Graham I State Com 701H | 30-015-*****          | M-1-26S-28E           | 218 FSL & 699 FWL  | ±3500          | None Planned     | APD Submission |
| Golden Graham I State Com 702H | 30-015-*****          | M-1-26S-28E           | 202 FSL & 1229 FWL | ±3500          | None Planned     | APD Submission |
| Golden Graham I State Com 721H | 30-015-*****<br>45324 | M-1-26S-28E           | 221 FSL & 732 FWL  | ±3500          | None Planned     | APD Submission |
| Golden Graham I State Com 722H | 30-015-*****          | M-1-26S-28E           | 202 FSL & 1262 FWL | ±3500          | None Planned     | APD Submission |
|                                |                       |                       |                    |                |                  |                |

**Gathering System and Pipeline Notification**

Well(s) will be connected to a production facility after flowback operations are complete, if gas transporter system is in place. The gas produced from production facility is dedicated to **Lucid Energy** and will be connected to **EOG Resources** low/high pressure gathering system located in Eddy/Lea County, New Mexico. **EOG Resources** provides (periodically) to **Lucid Energy** a drilling, completion and estimated first production date for wells that are scheduled to be drilled in the foreseeable future. In addition, **EOG Resources** and **Lucid Energy** have periodic conference calls to discuss changes to drilling and completion schedules. Gas from these wells will be processed at **Lucid Energy** Processing Plant located in **Lea** County, New Mexico. The actual flow of the gas will be based on compression operating parameters and gathering system pressures.

**Flowback Strategy**

After the fracture treatment/completion operations, well(s) will be produced to temporary production tanks and gas will be flared or vented. During flowback, the fluids and sand content will be monitored. When the produced fluids contain minimal sand, the wells will be turned to production facilities. Gas sales should start as soon as the wells start flowing through the production facilities, unless there are operational issues on **Lucid Energy** system at that time. Based on current information, it is **EOG Resources'** belief the system can take this gas upon completion of the well(s).

Safety requirements during cleanout operations from the use of underbalanced air cleanout systems may necessitate that sand and non-pipeline quality gas be vented and/or flared rather than sold on a temporary basis.

**Alternatives to Reduce Flaring**

Below are alternatives considered from a conceptual standpoint to reduce the amount of gas flared.

- Power Generation – On lease
  - Only a portion of gas is consumed operating the generator, remainder of gas will be flared
- Compressed Natural Gas – On lease
