Summary of Changes to APD Submission

Chevron respectfully requests the ability to change the cement details for the upcoming production cement job planned to be performed on this well. When this well was previously sundried to change the target formations, the submitted cement details did not reflect our current plan that is aligned with what other wells for these same targets are pumping.

Cicada Unit 22H

Slurry	Type	Top	Bottom	Weight	Yield	%Excess	Sacks	Water
Production								
Lead	Class C	8395	18,989	13.2	1.84	10	1450	9.85
Tail	Class H	18,989	19,989	15.0	2.18	10	116	9.55
