Operator,

The New Mexico Oil Conservation Division District 2 Office (OCD) is in receipt of a Closure Plan (plan) for a remediation project at the above referenced well site. The plan outlines work performed and includes analyses of samples obtained at the site. The plan proposes to back fill excavation and close site.

The plan is accepted as presented. Please submit a Form C-141 marked Final Report upon completion of activities.

Please be advised that NMOCD acceptance of this plan does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of this plan does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Please have project completed no later than July 21, 2006.

If I can be of assistance, please contact me.

Sincerely,

Mike Bratcher
