13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

As per phone conversation with John Simtz of BLM on 8/4/06, BEPCO, L.P. requests approval to alter surface casing setting depth from 550' as approved on 1/19/06 to 850'. This change is requested so that if circulation is lost in the reef and dry drilling required the amount of openhole above the reef will be minimized and therefore less danger of formations falling in and sticking the drill string.
