Other EXTENDTA STATUS

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum Corp respectfully requests permission to extend the ta status on this well. We have evaluated the Wolfcamp interval and plan to plug several wells based on that results, however; this well and a couple of the other Hill View wells are good candidates for possible horizontal drilling before giving up on these well bores. We will send in an intent to do this work when all research and plans have been finalized.

Note: MIT was conducted on 12/2/03
