If this is a pit closure: (1) Attach a diagram of the facility showing the pit's relationship to other equipment and tanks. (2) Indicate disposal location: (check the onsite box if		
your are burying in place) onsite 🛛 offsite 🗌 If offsite, name of facility		
remediation start date and end date. (4) Groundwater encountered: No 🛛 Yes 🔲 If yes, show depth below ground surfaceft. and attach sample results.		
(5) Attach soil sample results and a diagram of sample locations and excavations.		
Additional Comments: Excess water will be removed from the pit. A burial pit will be constructed and lined with a 12 mil impervious liner. The drilling pit contents will be		
mixed with clean soil to stiffen the content then placed in the burial pit. The burial pit will be capped with a 20 mil impervious liner with a minimum of 3 ft. overlap on all sides		
and a minimum of 3 ft. below ground level. The burial pit will then be covered with clean native soil and domed to prevent pooling. 5 bottom samples will be taken after all		
Pit contents are removed. A final report will be given at the end of the job. NMOCD will be notified 48 hrs before start of job.  As a condition of approval, if during		
pit construction water is		
encountered or if water seeps in pits		
I hereby certify that the information above is after construction the OCD MIST I further certify that the above-described pit or below-grade tank		
has been/will be constructed or closed according to the been been been been been been been be
