I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Re: LOV No 0217307
McKittrick 11-5 SWD
Eddy County, New Mexico

Dear Mr. Guye:

I just received your email dated 8-3-07 re: C141 on OXY McKittrick 11 Fed #5 (30-015-33611). Contaminated soil from this site was mixed with other soils and delivered to Lea Land. We save contaminated soils on plastic and try to make a full load when we haul. This location is built on solid rock and serves as a natural barrier to chlorides traveling down. There is no lateral movement of chlorides due to our secondary containment (dike). All fluids were contained inside location and picked up immediately by vacuum truck and disposed of in OXY production system. Prior testing of produced water in this system is less than 1000ppm chlorides. This site is an SWD location with minimal hydrocarbon collection and no visible sign of hydrocarbons were witnessed at time of release, therefore no TPH samples was taken.

The average depth to ground water in this area, T22S, R24E, S11, is greater than 100 feet and the closest well is in S24 and is 138 feet and this reading was taken from Chevron Texaco map which is I believe what NMOCDC utilizes along with depths from State Engineers Office. Distance to a water source and private wells is greater than 1000 feet and distance to surface water body is greater than 1000 feet. This gives this location a ranking of Zero (0).

Hopefully, this satisfies the information requested for closure of this event.

Sincerely,

Rick Kerby
HES Specialist
