13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Pogo Producing Company respectfully request changes to the subject well's APD. The rig selected for this project has been changed to JW #1. This rig does not have a 13-5/8" short BOP system. It has an 11" 3M BOP. We would like to set 13-3/8" surface casing & cement as per the original plan. We would then like to nipple up our 11" stack and test BOP's & casing to 1400 psi which is 80% 1730 psi max burst 13-3/8" 48# H-40 casing. We would like to use the rig pump for this test since a test plug for the 13-5/8" SOW head will not go through the 11" BOPE. We will then drill out with an 11" bit & set 8-5/8" casing instead of 9-5/8" casing. The 11" BOPE will be tested by a third party to max rating after setting intermediate casing. Production hole will be 7-7/8" through out the interval.

14. I hereby certify that the foregoing is true and correct
