Re: Homer State Com No. 1

Eddy County, NM

Dear Mr. Jones:

Enclosed is an original form C-107A (Application for Downhole Commingling) for the referenced well.

The Homer State Com No. 1 was recently drilled to TD. Logs show favorable Atoka and Morrow zones. Cimarex proposes to perf, stimulate, and flow-test the Morrow, then set a bridge plug on top of the Morrow and perf, stimulate, and flow-test the Atoka. Then the CBP will be drilled out and the zones will be commingled.

It is anticipated that the reservoir pressure from these two zones will be compatible and the resulting volumes would not warrant a tubing-casing dual completion.

All royalty, overriding royalty, and working interest owners are identical in the two zones, and will not be harmed by a Atoka/Morrow commingling.

If anything further is needed regarding this issue, or if you have any questions, please feel free to contact me at 972-443-6489.

Yours truly,

Zeno Farris
