Additional Comments: Our plan is to trench bury onsite. Excavate a trench adjacent to the drilling pit, line with 12mil plastic. Put contents of drilling pit in trench, cover with 20 mil plastic + 3 ft of clean soil. Sample bottom, and backfill pit only after OCD approves. Then backfill, level + seed. Notify BLM + OCD before starting + file sundry notice after closing will begin soon after approved.

**Of Pit**

Samples are to be obtained from pit area and analysis submitted to NMOCD prior to back filling. Notify NMOCD 24 hours prior to obtaining samples.

If burial trench is to be constructed in the pit area, samples are to be obtained from that area and analyses submitted to NMOCD prior to lining the pit, but after contaminated soils have been excavated from trench area.

Notify NMOCD 24 hours prior to beginning closure.

If pit is situated in an agricultural area pit contents must be hauled to an NMOCD approved disposal area.

Pits must be closed within 6 months of the date production casing is set.

Encapsulation insitu will be accomplished by mixing earthen materials with the pit contents, as necessary to stiffen the pit contents sufficiently to provide physical stability and support for the pit cover. No fluids are to be encapsulated in the bury pit.
