Re: Statewide Rule 118
Hydrogen Sulfide Gas Contingency Plan
Skelly Unit #969 – Drill Yeso oil well

Dear Bryan,

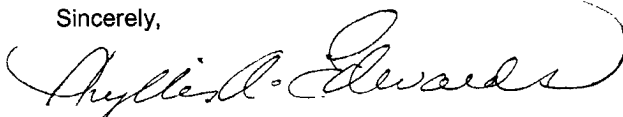

In accordance with NMAC 19.15.3.118 C (1) governing the determination of the hydrogen sulfide concentration in gaseous mixtures in each of its operations, COG Operating LLC does not anticipate that there will be enough H₂S in drilling the Yeso formation to meet the OCD's minimum requirements for the submission of a contingency plan for the drilling and completion of the following test:

Skelly Unit #969
1290 FSL & 330 FWL Section 14, T17S, R31E UL M Eddy County, NM

COG Operating LLC does have an H₂S Contingency Plan on location listing safety procedures and contact personnel should an unforeseen emergency arise.

Please call, e-mail, or fax me if you need anything further to approve this APD, and I thank you in advance for your cooperation in this matter.

Sincerely,

Phyllis Edwards
