I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

**Re: Roaring Springs 13 Federal #4
 Section 13 – T21S – R23E
 Eddy County, New Mexico**

Dear Gerry:

Pursuant to your request, enclosed is a Final Report (Form C-141) for the remediation of the captioned location.

As mentioned, we have completed cleanup of the location with regard to the spill of July 4, 2007. We will monitor the sites for growth during this next growing season, and proceed accordingly.

Should you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink that reads "Rick Kerby" followed by a stylized monogram or initials in parentheses.
