To Whom It May Concern: *R&A*

Marathon Oil Company has received a letter concerning the idle well - Federal IBB Gas Com #1. The letter received from the New Mexico Oil Conservation Division shows the last test for this well being 10/1/2006, however, our production records show the last test for this well occurred on 12/23/2006.

An AFE was created to place the Federal IBB Gas Com #1 on production by the means of rod pump. This AFE has been approved internally, and also by partners. Since approval, plans have been made to rent a portable pumping unit due to arrive on location February 5, 2008. With this portable pumping unit Federal IBB Gas Com #1 will be placed back on production by no later than 2/8/08. With the data provided from the portable pumping unit an in depth economic evaluation will take place. Should this well be deemed uneconomical to produce there will be a well review meeting to determine whether there are any other potential pay zones, or a procedure will be made to plug and abandon the well bore.

Please call if you have any questions or concerns.

Sincerely,

*Thomas L. Breninger*
