**ACCEPTED FOR RECORD****FEB 15 2008****Gerry Guye, Deputy Field Inspector**

3. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate location thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

All subsurface details of Plugging & Abandonment were provided on subsequent Sundry Notice dated March 15, 2000, a copy of which is attached. All drill cuttings were confined and hauled to waste disposal immediately after the subsurface plugging was completed

The surface location was restored and initially seeded by Sweatt Construction, Inc. of Artesia during April and June, 2000. Medallion Oil/Sweatt Construction then reseeded the site in January, 2001 and reported same to Medallion on February 5, 2001 via letter (See attached). The Forest Service reported on October 18, 2001 the location was disturbed and partially dredged after Medallion Oil Company-Sweatt Construction had seeded the location.

On October 19, 2001, after discussing the status of the site restoration with Mr. Larry Paul of the Forest Service, he indicated that he would write a letter releasing Medallion on the surface restoration.

4. I hereby certify that the foregoing is true and correct.
