13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleting horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleting in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

The Amoco #1 Well has been subjected to multiple incidents of vandalism, destruction and pilferage of equipment, including motors, nearly 3/4 mile of electrical wire which was literally 'yanked' out of the ground and 'torn' from the electrical boxes. As a direct result of the aforementioned the Amoco was debilitated.

CDM/FV is again replacing the 3/4 miles of electrical wire.

CDM/FV will dig a 3/4 mile 12"- 18" trench from the pump jack to the main electrical hook up and bury the electrical wire.

CDM/FV will again replace the electrical motor on the pump jack.

CDM/FV is replacing the Electrical Box.

All of the above should be initiated and completed during the month of August 2008.

These rehabilitative acts should activate this well and put it back into production.
