13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum Corporation wishes to change the Surface Use Plan to include a 2" X-42 steel buried pipeline being approximately 250-300' in length. It will start at the meter house on the east side of the and go due east to the tie-in point on NM-55584. Where the pipeline leaves the meter house will be approximately 90' north of the road as it leaves the pad. The road curves as it leaves the pad and the pipeline would not be able to follow the road making that bend. The route of the pipeline is staked and an archaeological study is being conducted 9/17/2003. Plats are included.

Thank you.
