Please amend the Indian Basin Field commingle as follows:

Production from the Indian Hills Unit 53 is sent to Station 128 Satellite Facility. The production manifold tied to the test and production separators allow for individual well testing of the Indian Hills Unit wells 10, 17, 19, 24, 34, 45, 49 & 53, while production from the remainder of these wells flows to the production separator. After separation, the gas and liquids are handled in the same manner described in the paragraph titled "Station 128 Satellite Facility in the current commingle agreement. I have attached an updated diagram of this facility and copies of this diagram will be sent of you by mail and to the Carlsbad office as well to update their site security diagrams for this facility.
