13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

CBS respectfully requests an extension of the current completion deadline for this new drill well from October 1, 2008 until April 1, 2009. This well is one of ten new wells CBS Operating drilled in the North Square Lake Unit. Eight of the ten wells have been completed.

In the course of evaluating results of the previous new well completions, CBS identified a mobility issue that it has employed some new technology to manage in the completed wellbores.

ACCEPTED FOR RECORD

CBS is currently working with the developers of this technology to employ it at the reservoir level, including in the completion process for the two remaining wells. CBS needs additional time to incorporate this technology in the completion of this well.
