Pit	Below-grade tank
Type: Drilling <input checked="" type="checkbox"/> Production <input type="checkbox"/> Disposal <input type="checkbox"/> Workover: <input type="checkbox"/> Emergency: <input checked="" type="checkbox"/> Lined: <input checked="" type="checkbox"/> Unlined: <input type="checkbox"/> Liner type: Synthetic <input checked="" type="checkbox"/> Thickness: 12 mil Clay: <input type="checkbox"/> Pit Volume: 2,000 bbl (estimated)	Volume: _____ bbl Type of fluid: _____ Construction material: _____ Double-walled, with leak detection? Yes: <input type="checkbox"/> If not, explain why not: _____
Depth to ground water: (vertical distance from bottom of pit to seasonal high water elevation of ground water)	Less than 50 feet: (20 points) 50 feet or more, but less than 100 feet: (10 points); 100 feet or more: (0 points)
Wellhead protection area: (Less than 200 feet from a private domestic water source, or less than 1000 feet from all other water sources.)	Yes: (20 points) No: (0 points)
Distance to surface water: (horizontal distance to all wetlands, playas, irrigation canals, ditches, and perennial and ephemeral watercourses)	Less than 200 feet: (20 points) 200 feet or more, but less than 1000 feet: (10 points); 1000 feet or more: (0 points)
	Ranking Score (Total Points): <b>0 Points</b>

If this is a pit closure: (1) Attach a diagram of the facility showing the pit's relationship to other equipment and tanks (2) indicate disposal location (check the onsite box if you are burying in place) onsite  offsite  If offsite; name of facility \_\_\_\_\_ (3) Attach a general description of remedial action taken including remediation start date and end date. (4) Groundwater encountered No X Yes  If yes, show depth below ground surface \_\_\_\_\_ ft and attach sample results. (5) Attach soil sample results and a diagram of sample locations and excavations.

Additional Comments: The attached schematic diagram illustrates the general orientation of drill pit relative to each drill pad, and where pit solids will be deep trenched buried. A Post Closure Form C-144 will provide documentation regarding the remedial actions taken and the confirmation soil analytical results.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines X, a general permit  or an (attached) alternative OCD-approved plan .

Date: March 14, 2008

Printed Name/Title: Lars Larson, Geologist

Signature: 

Your certification and NMOCD approval of this application/closure does not relieve the operator of liability should the contents of the pit or tank contaminate ground water or otherwise endanger public health or the environment. Nor does it relieve the operator of its responsibility for compliance with environmental federal, state, or local laws and/or regulations.

Approval:

Signature: Signed By:  Date: MAR 24 2008

NOTIFY OCD 24 HOURS PRIOR to beginning closure and 24 HOURS PRIOR to obtaining samples. Samples are to be obtained from pit area and analyses provided to OCD prior to backfilling pit.

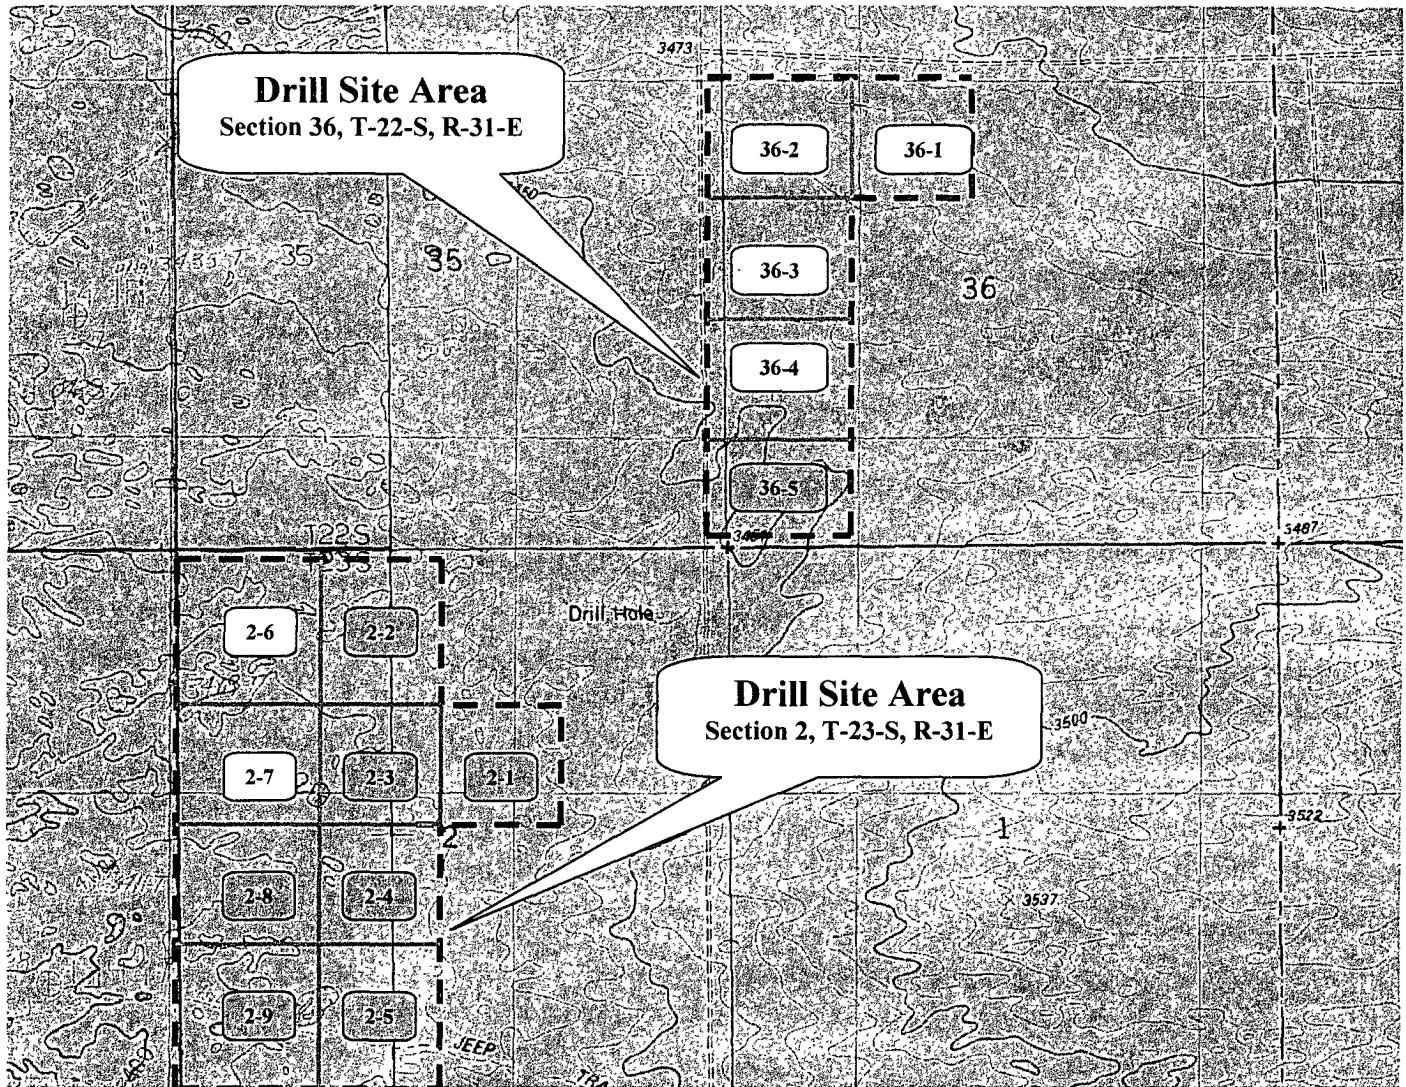

If burial trench is to be constructed to pit area, samples are to be obtained and analyses submitted to OCD, PRIOR to lining trench.

FINAL CLOSURE REPORT

Accepted for record  
 NMOCD

SEP 23 2008

2-2

- Drilled locations with pits closed and sites restored under approved Form C-144's.

2-6

- Permitted locations, but "not" drilled. Pits closed and sites restored under approved Form C-103's.

**Eddy County, New Mexico**

### **Drill Site Location - State #2-2**

- Form C-144 Drill Pit Closure Approval - March 24, 2008. Subsequent activities included the dewatering of these pits and the appropriate management and disposal of the liquid waste.
- In early to mid May 2008, after NM One-Call had been alerted of the proposed drill pit closure operations, New Mexico Environmental Services (NMES), on behalf of Reef Exploration, LP (Reef) began mobilizing equipment and materials to this site to begin drill pit closure.
- Shortly thereafter, NMES began excavation of the deep burial trench at this location and the stabilization of the pit solid material. The attached site schematic diagram illustrates the location of the deep burial trench and pit in relation to the overall well pad.
- The deep burial trench was excavated to dimensions that were approximately 100-feet long, by 20 to 25-feet wide, by roughly 15-20-feet deep.
- Once the drill pit solids had been appropriately stabilized and the burial trench was lined with a 20-mil HDPE liner, the pit solids materials were transferred to the deep burial trench. This process continued until all of the pit solids and few feet of the native soils underlying the drill pit had been excavated.
- Once the drill pit had been appropriately cleaned out, confirmation samples were collected from the pit bottom to document the total chloride concentrations. Field testing of the native material underlying the drill pit were as follows:

### **STATE #2-2 – Field Chloride Test Results (concentrations expressed in ppm).**

NE1/4	10'	250cl
NW1/4	10'	350cl
SW1/4	10'	250cl
SE1/4	10'	3000cl

14'      175cl

- Mike Bratcher of the NM-OCD was contacted on 5/23/08 @ 9:40 pm. Mr. Bratcher requested that NMES remove an additional 2' of material from the SE ¼ of the drill pit bottom and place into deep burial trench and backfill the pit. The official laboratory analytical report sheets for soil samples obtained from the drill pit bottom are included herewith.
- The liner in the deep burial trench was then welded (sewn) and sealed. Approximately 4-feet backfill material was then placed on top of the trench. The whole area was shaped and leveled for adequate drainage. In late August 2008, this burial trench and drill pit area was tilled and seeded to re-establish natural grass and vegetative cover.

161082	Sample #004 SE 1/4 10'	soil	2008-05-22	14:00	2008-05-23
161083	Sample #005 BG	soil	2008-05-22	15:00	2008-05-23
161084	Sample #006 SE 1/4 14'	soil	2008-05-22	14:45	2008-05-23

These results represent only the samples received in the laboratory. The Quality Control Report is generated on a batch basis. All information contained in this report is for the analytical batch(es) in which your sample(s) were analyzed.

This report consists of a total of 5 pages and shall not be reproduced except in its entirety, without written approval of TraceAnalysis, Inc.

Blair Leftwich, Director

### Certifications:

Lubbock - NELAP T104704219-08-TX  
El Paso - NELAP T104704221-08-TX

### Standard Flags:

B - The sample contains less than ten times the concentration found in the method blank.

## Case Narrative

Samples for project Ref Statd 2 Well #2 were received by TraceAnalysis, Inc. on 2008-05-23 and assigned to work order 8052314. Samples for work order 8052314 were received intact at a temperature of 26 deg C.

Samples were analyzed for the following tests using their respective methods.

Test	Method
Chloride (Titration)	SM4500 CT B

Results for these samples are reported on a wet weight basis unless data package indicates otherwise.

A matrix spike (MS) and matrix spike duplicate (MSD) sample is chosen at random from each preparation batch. The MS and MSD will indicate if a site specific matrix problem is occurring; however, it may not pertain to the samples for work order 8052314 since the sample was chosen at random. Therefore, the validity of the analytical data reported has been determined by the laboratory control sample (LCS) and the method blank (MB). These quality control measures are performed with each preparation batch to ensure data integrity.

All other exceptions associated with this report have been footnoted on the appropriate analytical page to assist in general data comprehension. Please contact the laboratory directly if there are any questions regarding this project.

**Eddy County, New Mexico**  
**CAC Project No. 15340.07**

Dear Mike;

Enclosed please find closure information for the eight (8) drill pits that Reef Exploration, LP (Reef) has closed by the deep trench burial method in southeast Eddy County, New Mexico. The attached topographic map of the area illustrates the locations of these drill pits. Each of the drill pit closure packets in this submittal includes the following information:

1. **Form C-144's** – photocopies of the approved Form C-114's for each drilling location.
2. **Site Schematic Drawings** – these schematic drawings illustrates the locations of each drill pit and deep burial trench relative to the drill pad, as well as the locations of the confirmatory soil samples.
3. **Pit Closure Narrative** – a brief explanation of the remedial actions that took place in association with each location drill pit, the field analytical testing that was conducted, and backfilling and site restoration completed.
4. **Laboratory Analytical Data** –the laboratory analytical report sheets for the confirmation samples collected within each drill pit are also included.

We appreciate your assistance throughout this drill pit closure process. Once you have reviewed this information, please contact me if you have any questions.

Very truly yours,  
**Covington and Associates Corporation**

Lars Larson, P.G.  
Senior Geologist
