13 Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Due to being unable to get 8 5/8" casing to bottom in 11" hole, we now propose the following:

1. Open hole from 11" to 12-1/4" from surface casing shoe (768') to 3510'.
2. Set 8-5/8", 32#, J-55 ST&C @ 3510'.
3. Install cementing baskets above lost circulation interval @ 900' and 884'.
4. Install DV Tool @ 880'.
5. Cement first stage with 1525 sks. Lead (yield = 1.97) and 200 sks. Tail (yield = 1.33).
6. Cement second stage with 105 sks. Lead (yield = 1.97) and 200 sks. Tail (yield = 1.33).
7. Top off cement with 1" as required to bring top of cement to surface.
8. After cement cures, run a cement bond log.

ACCEPTED FOR RECORD

**RDX "17" #1  
30-015-36504  
RKI Exploration & Production  
October 7, 2008  
Conditions of Approval**

- 1. Additional cement may be needed on second stage as excess cement calculates to less than 25%.**
- 2. If cement does not circulate on first stage, contact the BLM.**
- 3. Production casing cement job could be modified based on results from CBL.**
