NATURE OF RELEASE

Type of Release Produced Fluids	Volume of Release 8 bbls	Volume Recovered 0
Source of Release Flowline released	Date and Hour of Occurrence	Date and Hour of Discovery
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? 9/23/07 10:00 AM Jim Amos	
By Whom?	Date and Hour 9/24/07 1:00 PM	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

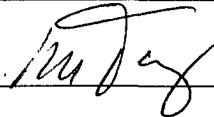

Describe Cause of Problem and Remedial Action Taken.\*

Restriction in the flow line created high pressure in the line causing the flow line to leak. Well was shut in. There were not free standing fluids.

Describe Area Affected and Cleanup Action Taken.\*

Line was repaired, Spill area was assessed. The TPH and BTEX were all below the RRAL. The chloride impact at the site was shallow and decreased below 250 mg/kg at 1-1.5' below surface. Due to road construction, the road was expanded and encompassed the area of concern. A closure report was submitted to NMOCD for review.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
