13. Described Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Slated to begin in February 2009, the plugging and abandonment of the subject well will precede the need to perform final abatement proceedings. Read & Stevens, Inc has already removed surface facilities including the tankage and separation vessels. Upon plugging, the guyline anchors will be removed and marker installed. Read & Stevens, Inc proposes to remove any contaminated material from the site to an approved facility. The reserve pit area will be topped with 15' - 2' of caliche from the well pad followed by a cap of 15' topsoil contoured to the lay of the land. Any remaining caliche from the pad or road will be used for road repairs. The area will be ripped and reseeded with BLM approved seed mix for gyp upland, SD-3 ecological sites.
