** Marathon Oil Company is reviewing, and re-evaluating the above named well for its economic and beneficial use potential, and is requesting for a T/A status extension. Justification: Current oil pricing precludes further risky completions, and wellbore may be needed for 'SWD' at a future date. Wellbore does not pose an environmental risk, and proximity of well is not located in an environmentally sensitive area, or near a resident, or population. Referencing a prior approval for T/Aing this well from James A. Amos (Supervisor - EPS), signed June 27, 2008, granting T/A until 03/28/2009 which is nearing expiration, Marathon is scheduling, and is preparing for a 'MIT' test to be performed, and will notify the appropriate area inspector for witnessing testing 24-hours in advance of actual testing. Once a successful test has been established, the 'MIT' test chart will be attached to a 3160-5 Sundry, and submitted for T/A approval.

After 6-28-09 the well must be online or plans to P & A must be submitted.

RU and removed 7" 5,000# WHF. Set CIBP @ 7,485'. Tagged plug to ensure setting depth. Re-installed 7" 5,000# WHF. Load wellbore with 105# packer fluid. Tested pressure to 600 psig @ surface to test CIBP and charted for 40 minutes with no visible bleed off. Bleed off pressure, rig down.

Was given verbal approval by Ron Harvey- OCD on 3/28/08- gave verbal approval as he could not physically get to location to witness test.

* By 3/28/08, either return the well to production or submit plans for Abandonment.
