13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Chesapeake, respectfully, requests permission to reclaim this location. We plan to remove the Tank battery on the PLU Ross Ranch 31 Fed 1H. A flow line will be ran to the PLU Ross Ranch 6 Fed 1H. The tanks will be moved to the PLU Pierce Canyon 12 Fed 1H (pending APD approval and when it is drilled). The heater treater and separator will be moved to the PLU Ross Ranch 6 Federal 1H.

After the tanks are removed the portions of the cleared well pad not needed for operational and safety purposes will be re-contoured back to natural surroundings as much as possible. Caliche material will be used either to re-contour or will be used to repair roads within the lease. Topsoil material will be spread out over reclaimed area and the site will be seeded with an approved BLM grass mix. In order to inspect and operate the well or complete work over operations, it may be necessary to drive, park and operate on restored vegetation as long as the damage is repaired or reclaimed after work is complete. The well pad will be pulled into within 30 feet of

14 I hereby certify that the foregoing is true and correct
