13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

OXY USA WTP LP is requesting a Temporary Abandonment extension of 3 years for the subject well. OXY USA WTP LP took ownership of this well 5/28/09. The subject well is in a group of 40 wells in which OXY has scheduled to recompleate. OXY has located a productive sand across multiple wellbores of the NIBU (3000' +/-). There is no offset production to prove the sand. OXY has budgeted to recompleate 5 wells in 2010. If the 5 wells prove to be productive OXY will then continue on with the project to recompleate another group of wells. The project includes wells over a large area and is estimated to take 5 years to complete the project. The wellbore does not pose an environmental risk. Proximity of wellbore is not located in an environmentally sensitive area, or near a resident or population.

Well had an approved T/A status as of 4/13/2009 (Test date 3/20/2009) filed by the previous operator that expired 1/1/2010 (see attached copy of approved T/A and test chart).

BOND: Safeco, Nationwide Oil & Gas Bond No. 619460/ BLM Bond No. ESB0136

Approval to extend TA until 11/1/2010 is granted. That will have given this well 3 years in TA status. At that time the well must be online or plans to P&A must be submitted. This is the last TA for this well.
