OTHER: ☐

13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Yates Petroleum Corporation plans to plug and abandon this well as follows:

1. NU BOP. Rig up any safety equipment as needed. No casing recovery will be attempted.
2. Set a CIBP at 7634' with 35' cement on top. This will place a plug over open Canyon perforations.
3. Spot a 160' cement plug from 5752'-5912'. This will leave a plug across the Wolfcamp top.
4. Spot a 140' cement plug from 3730'-3870'. This will leave a plug across Bone Spring top.
5. Spot a 120' cement plug from 2191'-2311'. This will leave a plug across Glorieta top.
6. Spot a 150' cement plug from 992'-1142'. WOC and tag plug, reset if necessary. This will leave a plug across surface casing shoe.
7. Spot a 150' cement plug to surface. WOC and tag plug, reset if necessary. This will leave a 150' surface plug.
8. Remove all surface equipment and weld dry hole marker per regulations.

Due to the volume of wells we currently have plans to plug, both State/Fee and Federal, Yates Petroleum respectfully requests a time frame of 1 year to have commenced plugging operations and for this notice of intent to be in affect
