Accumulator Function Test - 00&GO#2

ASC Rev. 06/02 Eddy Patteson 47

10 Check - USABLE FLUID IN THE NITROGEN BOTTLES (ULA.2.c.lor ii or iii)

- Make sure all rams and annular are open and if applicable HCR is closed.
- Ensure accumulator is pumped up to working pressure! (Shut off all pumps)
 - 1. Open HCR Valve. (If applicable)
 - 2. Close annular.
 - 3. Close all pipe rams.
 - 4. Open one set of the pipe rams to simulate closing the blind ram.
 - 5. For 3 ram stacks, open the annular to achieve the 50±% safety factor. (5M and greater systems).
 - 6. Record remaining pressure 1800 pei. Test Fails if pressure is lower that required.
 - a. {950 psi for a 1500 psi system } b. { 1200 psi for a 2000 & 3000 psi system }
 - 7. If annular is closed, open it at this time and close HCR.

To Check - PRECHARGE ON BOTTLES OR SPHERICAL (III.A.2.d.)

- Start with manifold pressure at, or above, maximum acceptable pre-charge pressure;
 - a. {800 psi for a 1500 psi system } b.{1100 psi for 2000 and 3000 psi system}
 - 1. Open bleed line to the tank, slowly. (gauge needle will drop at the lowest bottle pressure)
 - 2. Close bleed line. Barely bump electric pump and see what pressure the needle jumps up to.
 - 3. Record pressure drop 1000 psi. Test fails if pressure drops below minimum.
- Minimum: a. (700 psi for a 1500 psi system) b. (900 psi for a 2000 & 3000 psi system)

To check - THE CAPACITY OF THE ACCUMULATOR PUMPS (III.A.2.f.)

- Isolate the accumulator bottles or spherical from the pumps & manifold.
- Open the bleed off valve to the tank, {manifold psi should go to O psi} close bleed valve.
 - 1. Open the HCR valve, {if applicable}
 - Close annular.
 - 3. With pumps only, time how long it takes to regain the required manifold pressure.
 - 4. Record elapsed time 53 SEC. Test fails if it takes over 2 minutes.
- a. {950 psi for a 1500 psi system}
 b. {1200 psi for a 2000 & 3000 psi system}

Accumulator working pressure rating	Minimum acceptable operating pressure	Desired precharge pressure	Maximum acceptable precharge pressure	Minimum acceptable precharge pressure
1,500 psi	1,500 psi	750 psi	800 psi	700 psi
2,000 psi	2,000 psi	1,000 psi	1,100 psi	900 psi
3,000 psi	3,000 psi	1,000 psi	1,100 psi	900 psi

Usable Fluid = ½ of bottle volume. {11 gal. = 5.5 gal } {10 gal. = 5 gal.} { 80 gal. sphere = 40 gal.} Reservoir cap: Heigth 37 x Length 172 x Width. 14 x 0.004329 = 3 8 6 Gal.
