NMOCD-ARTESIA

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

OXY USA WTP LP request a 90 day Temporary Abandonment period status approval. An approval will help OXY maintain an "in compliance" status with the NMOCD while OXY works to TA, RTP, and PA wells in their YESO Project. An out of compliance status is looming in the near future pending the approvals to TA wells, a Plan of Development and a December 7th meeting with the BLM.

This well has been shut in for a length of time while OXY performed remedial work and refiled the Injection Permit with the NMOCD. OXY was advised by the NMOCD to take this application to hearing to establish the well as either a Pressure Maintenance well or SWD. OXY's staff geologist and engineers need 30 days to evaluate and prepare aids for the hearing. At that time OXY will set a hearing date for January 2011. Upon approval at hearing OXY will need to replace a flowline on location and return the well to injection. This well is of beneficial use to OXY to reduce trucking needs. This well has changed hands within OXY a number of times since shut in. The current business unit is working as quickly as possible to return the well to beneficial use.

TD-6725' CIBP-6314' Perfs- 6378-6619' upon approval OXY will MIT the well per rules.

well last used as wtu 8/2004
