Irrigation Line.

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration. If the proposed is to deepen directionally or recompleat horizontally, give subsurface locations measured and true vertical depths of all pertinent markers and Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 d following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed. Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operation determined that the site is ready for final inspection.)

BOPCO, L.P. respectfully requests approval to install 10" (aluminum irrigation pipe) temporary fresh water lines from the JRU # 107H frac pond. There are (5) wells this line will service. They are as follows, JRU # 129H (red line), JRU #130H (green line) all located in section 36, T22S, R30E. The next (2) wells, JRU #109H and JRU #110H (pinkish red line) are both located in section 1, T23S, R30E and on the same location. The next well, JRU # 115H (blue line) is located in section 5, T23S, R31E, the line will end in section 6 at the west side of the location.

The 10" line will begin in section 36, T23S, R31E (line marked in blue on map) and will stay in place until the 5 wells are completed. Each major road crossing will have a buried 10" SDR 9 poly pipe to eliminate ramps across the road. It will take approximately 7 months +/- to complete these wells. All routes have been previously arch cleared and follow existing lease roads and ROW's. The road crossing under the WIPP road has already been completed. The temporary line will limit the use of frac tanks and water hauling. The plats and a map are included.
