13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Operator submitted an NOI sundry 03/23/2011 requesting an additional 30 days to monitor this wellbore. The original request expired 03/23/2011.

03/31/2011 - Operator contacted BLM Inspector Richard Carrasco, Hobbs, and discussed the following: During the monitoring period of the week of 03/28/2011, the production casing SIP = 0, the surface casing SIP = 0. The intermediate casing SIP = 4 1/2 psi. The intermediate casing pressure has been consistent over the past several weeks. Operator loaded the intermediate casing with water and monitored it for an hour with no signs of gas migration.

Operator requests that since the well no longer is exhibiting gas bubbles to surface that the P&A be allowed to continue as follows:
