NATURE OF RELEASE												
Type of Relea	ase: Produc	X		Volume of Release: 40 bbls produced water and 20 bls crude oil					fluid			
Source of Re	lease: Heate			Date and Hour of Occurrence Date and Hour of Discovery 5/2/11, Hour unknown 5/2/11 10:00 a.m.								
Was Immediate Notice Given? ☐ Yes ☐ No ☐ Not Required						If YES, To Whom?						
By Whom? Tony Savoie						Date and Hour 5/2/11 10:51 a.m.						
Was a Watercourse Reached? ☐ Yes ☑ No						Date and Hour 5/2/11 10:51 a.m. If YES, Volume Impacting the Watercourse RECEIVED					7	
If a Watercourse was Impacted, Describe Fully.*						<u> </u>				MAY 04 2011		
									NIR A			
NMOCD ARTESIA												
Describe Cause of Problem and Remedial Action Taken.* A gasket failed on the heater treater fire tube. The heater was isolated and crews are working to replace the gasket.												
Describe Area Affected and Cleanup Action Taken.*The caliche pad around the pumping well and tank battery location had isolated pockets of produced water and crude oil, the liquid also traveled down a lease road for approximately 360 ft. The entire area of the well pad and battery location was also covered with a fine mist of crude oil and produced water; this was approximately 67,500 sq. ft. The pasture land located to the South West of the battery was also affected with the fine mist of crude oil and produced water; this area was approximately 33,600 sq. ft. All of the free standing fluid was picked up with a vacuum truck. The saturated soil was scraped up and stockpiled on the caliche well pad. The pasture area was left alone The Site remediation for the produced water and crude oil spill will follow the NMOCD guidelines for leaks and spills.												
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
