13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum Corporation plans to temporarily abandon this well as follows:

1. TIH with bit and drilling assembly to drill out the cement in the 7" casing below the Canyon perms.
2. After we fall through the cement, POOH with bit and TIH with tubing open ended to a depth of 9351'. Spot a 200' Class "H" cement plug from 9151'-9351'.
3. Set a CIBP at 7350' with 35' cement on top. WOC and tag the cement with wireline, if we do not tag cement, dump bail enough cement to get at least 35' coverage on top of the CIBP.
4. Rig down equipment. Run an MIT and apply for temporarily abandoned for a period of one year.
