

21. **Proposed Casing and Cementing Program:** On a new well or deepening this information is usually supplied by your drilling department. On other than a new well or deepening you can state "see initial application"

22. **Describe the proposed program:** This program description can usually be found in the AFE or drilling program write up for the well. If there is not enough room you can write in Section 22 "see attached" and include an additional page showing the proposed work. For deepen and plugback give the existing data on the current producing zone, proposed new producing zone. A description of the blowout prevention program, if any, needs to be included or attached. See Rule 109 for BOP requirements.

23. **Certification:** This form MUST be signed

Approval: Do NOT fill out this out, this is for the ODC use.
