(NOTE: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was drilled to total depth of 10,265' in Devonian. On November 6, 1974, this well was plugged back to 9770' in the Mississippian with a 100' 35 sack cement plug at 10,000 to 10,100' at the top of the Devonian and a 100' 35 sack cement plug at 9770' to 9870'.

4 1/2" casing was set at 9764' with 500 sacks of Class "C" cement. A temperature survey shows the top of cement at 8600' behind the 4 1/2" casing.

The above program is according to telephone conversation with Mr. Beekman. The cementing work was done by Halliburton.

18. I hereby certify that the foregoing is true and correct
