No well will be assigned an allowable greater than the amount of oil produced on the official test.

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowances when authorized by the Commission.

Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base will be 0.60.

Report exact pressure in lb. of tubing gas rise for any well producing through casing.

Well output and gas-oil ratio to be reported to the district office of the New Mexico Oil Conservation Council in accordance with Rule 301 and regulations of the Commission.

I hereby certify that the above information is true and complete to the best of my knowledge and belief.
